Your exact GPS location will be available to them.

Share Your Trip - You can share your trip to family and friends who can track you. We recommend using this function in training.

TRACKING WEBSITE

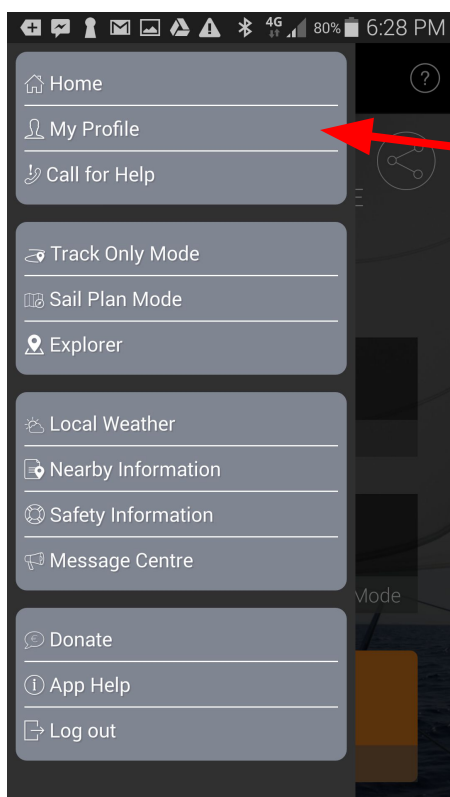

- The tracking website link is <https://flotilla.safetrxapp.com/events/op/thedoctor> and will also be available on the Oceanpaddler website prior to the race.
- After the race you can watch a replay of the full event tracking.
- Please read the **Race Day Preparation Notes** on the following page for further details.

SAFETRX TRACKING INSTRUCTIONS THE DOCTOR 2018

Race Day Preparations

1. Carry your phone in a waterproof pouch to avoid damage.
2. Make sure you have the latest version of SafeTrx installed.
3. Make sure your phone is fully charged.
4. If you can, use a backup battery and attach it to the phone to extend the battery life or carry a phone charger and connect to power where available.
5. 'Continuous' mode for the tracking interval is the preferred option.
6. For iPhone, use the new Apple iOS feature to check the max capacity of the iPhone. If maximum capacity of iPhone is <60% then you will need to run SafeTrx in 10 minute mode if you don't have a backup battery. If maximum capacity of iPhone is >60% then you will run SafeTrx in continuous mode.
7. If you think the race will take you longer than 3hrs then consider using the 10 minute mode to preserve battery life
8. Make sure all other data logging applications (such as Strava etc.) are deactivated.
9. Make sure the phone has a clear and unobstructed view of the sky and land before beginning the race. This will allow the phone to get a lock on the GNSS satellites and the nearest cell tower.
10. If racers are heading from W-E, then the phones should be in the chest area in waterproof plastic pouch.
11. Do not put another electronic tracker in the same waterproof pouch.
12. Turn down brightness on the device.
13. Switch off WiFi and Bluetooth.
